Asena Beshiktepeli

E-commerce Virtual Assistant & Customer Support

Kyrenia, Cyprus (EET, UTC+2) · Fully remote, flexible hours
asenabeshiktepeli@gmail.com · asenabeshiktepeli.github.io · github.com/asenabeshiktepeli

Summary

Customer-facing professional with nearly 8 years in sales and after-sales support, handling the full order cycle from quote to delivery and payment. Now supporting e-commerce businesses remotely with customer support, order and shipping tracking, and clean, organised data in Excel and Google Sheets. Builds simple automations in Python to save time on repetitive work.

Experience

Sales Consultant · Cagra Co LTD, Kyrenia, Cyprus **Nov 2018 – Aug 2026**
Building materials and interior decoration supplies

- Grew the international client base by about 60% and reached 120% of internal sales targets in multiple years.
- Handled customer communication by email, phone and face to face with local and international clients.
- Prepared quotes and proformas, tracked orders and coordinated shipping until delivery.
- Managed complaints and returns, and followed up on invoices and payments in Logo Tiger 3.
- Prepared tables and reports in Excel and Google Sheets.
- Trained new colleagues on Logo at entry level.

Projects

Job-search automation pipeline · personal project **Python · SQLite · Git**

- Built with an AI coding assistant: collects job listings from multiple sources, scores them against set criteria, checks ATS compatibility and drafts tailored cover letters.
- Tracks every application in a SQLite database, covered by 500+ automated tests. No email is sent without manual approval.

Portfolio samples · sample projects with fictional data **Google Sheets · Docs · HubSpot · Jira**

- Order Tracking Sheet with a live dashboard and daily follow-up list.
- Customer Support Response Library: 10 reply templates with response time targets and escalation rules.
- Data Cleanup workflow: a messy customer export cleaned with reusable formulas and a full change log.
- Help desk practice in HubSpot and Jira Service Management: ticket pipelines, internal notes vs. customer replies, priorities and SLA goals; test data loaded with Python through the HubSpot API.

Skills

Support and operations: customer support by email and chat, order and shipping tracking, quotes and proformas, invoice and payment follow-up, complaints and returns, data entry and cleanup, spreadsheet reports.

Tools: Logo Tiger 3, Microsoft Excel, Google Workspace (Sheets, Docs, Slides, Drive, Calendar, Gmail), HubSpot and Jira Service Management (practice accounts), Trello, Asana, Notion, Slack, Zoom, Google Meet, n8n, Python, VS Code, SQLite, Git and GitHub, Claude and other AI assistants.

Certifications

- **Google Advanced Data Analytics Certificate**, Google (Coursera) · May 2026
- **ALX Virtual Assistant Programme**, Certificate of Achievement, 10-week programme in Virtual Assistance Skills in the Digital Age · Nov 2025
