Asena Beshiktepeli

Customer Support & E-commerce Virtual Assistant

Kyrenia, Cyprus (EET, UTC+2) · Fully remote, flexible hours
asenabeshiktepeli@gmail.com · asenabeshiktepeli.github.io · linkedin.com/in/asena-beshiktepeli

Summary

Nearly 8 years of customer-facing support and sales, HubSpot Service Hub certified, working in Turkish and English. Handled the full order cycle from quote to delivery and payment. Now supporting e-commerce businesses remotely with customer support, order and shipping tracking, and clean, organised data in Excel and Google Sheets. Builds simple automations with n8n and Python to save time on repetitive work.

Experience

Sales & After-Sales Support Consultant · Cagra Co LTD, Kyrenia, Cyprus **Nov 2018 – Aug 2026**

Building materials and interior decoration supplies

- Answered customer questions by email, WhatsApp, phone and face to face, for local and international clients.
- Tracked orders and coordinated shipping until delivery, and managed complaints and returns.
- Prepared quotes and proformas, and followed up on invoices and payments in Logo Tiger 3.
- Grew the international client base by about 60% and reached 120% of internal sales targets in multiple years.
- Prepared tables and reports in Excel and Google Sheets.
- Trained new colleagues on Logo at entry level.

Projects

Job-search automation pipeline · personal project **Python · SQLite · Git**

- Built with an AI coding assistant: collects job listings from multiple sources, scores them against set criteria, checks ATS compatibility and drafts tailored cover letters.
- Tracks every application in a SQLite database, covered by 900+ automated tests (pytest). No email is sent without manual approval.

Portfolio samples · sample projects with fictional data **n8n · Google Sheets · HubSpot · Jira**

- Customer Request Automation in n8n: form to Asana task, Calendar follow-up and Sheets log, synced hourly.
- Order Tracking Sheet with a live dashboard and daily follow-up list.
- Customer Support Response Library: 10 reply templates, escalation rules and an AI draft review guide.
- Data Cleanup workflow: a messy customer export cleaned with reusable formulas and a full change log.
- Help desk practice in HubSpot and Jira Service Management: ticket pipelines, internal notes vs. customer replies, priorities and SLA goals; test data loaded with Python through the HubSpot API.

Skills

Support and operations: customer support by email and chat, order and shipping tracking, quotes and proformas, invoice and payment follow-up, complaints and returns, data entry and cleanup, spreadsheet reports.
